**Cox Business Signs Multi-Year Contract for Advanced Telecommunications
At Trump International Hotel & Tower**

HENDERSON, Nev. – Cox Business / Hospitality Network, a full-service, facilities-based provider of advanced voice, video and data solutions as well as a leading source of in-room video and data technology services to the hotel-gaming industry, today announced it has signed a multi-year agreement with Trump International Hotel & Tower in Las Vegas to provide telephone, high-speed Internet and cable television services. Cox Business is providing telecommunications services to all 1,282 luxury condominium-apartments.

David Blau, vice president and general manager of Cox Business, notes about the telecommunications deployment, “We’re very excited about this installation at Trump International in Las Vegas. It continues to demonstrate Cox’s ability to provide a comprehensive suite of hospitality applications to satisfy the needs of this luxury development. Early in the planning process, it was clear that Trump was seeking a single provider who could deliver advanced video, voice and data services. We are pleased to be the provider of choice.”

Among other services, the agreement provides for local, long distance, international and toll free telephone service.

A 100 Mbps fiber optic connection to the luxury property will provide high-speed Internet to all luxury units as well as the tower’s administrative back office and public areas. The Cox hybrid fiber/coaxial broadband connection will be used to support wired and wireless Internet connectivity throughout the facility.

The agreement also calls for the availability of free-to-guest cable television and high-definition programming.
